

Kavi B

Software Test Engineer

Education

Bachelor of Engineering: MECHANICAL ENGINEERING

2014 - 2018 | Dr.N.G.P INSTITUTE OF TECHNOLOGY

Graduated with 61% - 6.09CGPA.

Experience

Way2Smile Solution Pvt Ltd

Designation : Quality Analyst - Lead

Duration : Sep 2023 - Present

Sensiple Software Solution Pvt Ltd

Designation : Software Test Engineer

Duration : Sep 2019 - Mar 2023 (3.7 Years)

- 4 years of Experience in Software Testing (Manual and Automation Testing).
- Professional experience with **Automation testing** in Web-based applications using **Selenium Web driver** and **JAVA** as a programming language.
- Expertise in **BDD framework** to develop test cases in Gherkin language using **Cucumber** as a plugin and **Maven** as a build automation tool.
- Implemented **Page Object Model** (POM) from scratch to represent web pages. Performed effective and optimized **Excel and File validations** across the applications in automation.
- Developed re-usable automated test scripts for various testing like Regression testing, Functional testing, Sanity testing, Integration testing and User Acceptance testing.
- Expertise in handling Testing and **JUnit** framework.
- Experience in **Agile methodology** and good understanding of **STLC** and **SDLC**.
- Preparing test cases based on the business requirements using testing technics like Boundary value analysis (BVA), Equivalence class partitioning (ECP), Decision Table Based, State Transition.
- Tracked all the automation testing activities in **JIRA** tool.

About Me

Driven IT professional with 4 years of Software Testing experience looking for a challenging and creative role in work place utilizing the technical, interpersonal, time management

Technical Skills

Testing Tool

- Selenium WebDriver

Programming Language

- Core Java

Frameworks

- Cucumber BDD
- TestNG
- JUnit
- Page Object Model
- Data Driven Framework

IDE Tool

- Eclipse

Build Tool

- Maven

Version Control Tool

- Git

Test Management Tool

- Azure DevOps – Microsoft

CI & CD Tool

- JENKINS

Methodology

- Agile

- Experienced in Maven build tool and version control using **GIT**
- Hands On experience with **Jenkins** tool for achieving the **Continuous Integration**.
- Tracking changes and maintenance of Test Requirements.

Career Contour

Project 3: Learn & Play (Educational Domain)

Quality Analyst

Learn & Play This app would be particularly useful for parents who are new to an area and want to find local schools, tutoring, and extracurricular or leisure activities. The target audience would also be individuals (tutors) who are interested in teaching students in live sessions and courses.

- User Mobile App
Android
IOS
- User Web App
- Service Provider Web App
- Business Admin Web App

Roles and Responsibility

- Develop and implement a comprehensive QA strategy for the project, including test scenarios, test cases, and test methodologies.
- Ensure that all deliverables meet quality standards and adhere to established processes and procedures.
- Plan, prioritize, and execute test cases and scenarios to verify software functionality.
- Oversee the defect tracking process, including logging defects, prioritizing them, and working with development teams to resolve issues in a timely manner.
- Collaborate with clients to gather and clarify requirements, ensuring a clear understanding of project objectives and deliverables.
- Manage scope creep by clearly defining project scope, setting expectations, and negotiating changes as needed.
- Proactively identify and address any issues or conflicts that may arise during the project, working closely with both internal teams and clients to find solutions.
- Execute test cases manually to identify defects, inconsistencies, and areas of improvement. Perform various types of testing such as functional testing, regression testing, integration testing, and user acceptance testing (UAT).
- Defects reporting and daily status report.
- Reviewing the Test Reports and Preparing Test Summary Report.
- Testing the application across different web browsers such as Chrome, Firefox, Safari, Edge, and Internet Explorer to ensure consistent rendering and functionality.

Project 2: Invipro (Supply Chain)

Software Test Engineer

Invipro Manage your inventory effortlessly across multiple stores and warehouses with our centralized solution. Keep track of stock levels, restock items, and transfer products between locations with ease.

Roles and Responsibility

- Analysing the user stories.
- Preparing the test scenarios, test cases and preparing test data.
- Analysing the test cases and identifying which can be automated and which cannot be automated.
- Preparing automation scripts in WebDriver with cucumber.
- Developing BDD and tests using Cucumber by writing feature files and step definitions.
- Creating highly efficient and maintainable Java code to develop Page Objects Models.
- Developing reusable functional components in the framework.
- Execution of test scripts and debugging.
- Used Maven to build and run the Selenium automation framework.
- Raise and track defects until closure and Re-test resolved defects.
- Involved in testing the application utilizing the Scrum (Agile) methodology.
- Participated in the all-Agile ceremonies – Sprint planning, daily Scrum meeting, Sprint review and Sprint retrospective.
- Defects reporting and daily status report.
- Reviewing the Test Reports and Preparing Test Summary Report.
- Implement continuous Integration Test execution after every schedule build and track the results using Jenkins.

Project 1: Migros (E-Commerce)

Software Test Engineer

Migros: User can do your shopping online at your own comfort. Choose from our range of over 12,500 products. Just select the "Order" tab on the bottom right and place the products you want to buy in your shopping cart. Now all you need to do is to choose your delivery date and pay by credit card.

Roles and Responsibility

- Participating in analysis of Functional requirements.
- Preparing Test Case based on functional Specification documents to satisfy the new business requirement.
- Involved in Functional Testing, System Testing, Integration Testing
- Coordinated with other interns to test the application using Black box techniques, and prepared reports on findings.
- Interacted with the Development teams and Analyst to understand the functionality to test it effectively.
- Peer review of Test scripts/cases, Test Data reports.
- Reporting and Tracking bugs
- Performed regression testing on software after the bugs were fixed to verify if new bugs are generated in the product
